**INSIGHT TELEPSYCHIATRY, LLC** houses our telepsychiatry services under which we have a network of psychiatrists available 24/7 to conduct psychiatric evaluations and medication management using televideo conferencing. While InSight is a new entity, CFG has been doing telepsychiatry for 11 years and our infrastructure and experience is significant.

**INWORLD SOLUTIONS, LLC** is the entity through which we are developing our virtual environments for clinical settings. It is essentially a software tool that allows a clinician and a patient to assume characters (avatars) of themselves and interact with one another in a virtual meeting space that is private, secure, and built with specific functionality to facilitate the therapeutic encounter. We have been developing this in house through feedback from our own clinicians and have found it remarkably engaging and effective, particularly for children and adolescents.
